Labnet BioPette™ A Autoclavable Single- and Multi-channel Pipettors

Available in single-, eight- and twelve-channel configurations, all BioPette A pipettors feature smooth plunger movement with low pipetting forces. Volume can be set by turning either the thumb wheel or the plunger button. BioPette A pipettors have been designed to maintain their calibration, even after repeated use and autoclaving. A calibration key is included with each pipettor for easy in-house calibration.

BioPette A multi-channel pipettors feature individually spring-loaded piston assemblies for positive tip sealing and a curved ejector bar requiring minimal ejection force. The multi-channel manifold rotates 360° for ejecting and pipetting in any position.

Features

- Factory calibrated to strict ISO 8655 standards
- 3-year warranty
- Fully autoclavable and UV resistant
- Designed for universal fit with all common brands of pipet tips
- Adjustable tip ejector in all single-channel models
